- The purpose of standards
- Motivation for software testing standards
- Development of standards
- Overview of ISO 29119
- Applicability
- Timeline
- Future involvement

What are standards?

"Guideline documentation that reflects agreements on products, practices, or operations by nationally or internationally recognized industrial, professional, trade associations or governmental bodies"

- ISO

- **Guidelines** documents as they are not compulsory unless mandated by an individual or an organization
- **Agreements** because they should reflect a certain level of consensus

Why use standards?

- Consumers
 - Confidence in compliant products
 - Authors provide expertise in standards
- Manufacturers
 - Conformance and Marketing
 - ‘Safety’ from liability
 - Guidelines on production
- But not ‘Best Practice’...

Quality and Standards

tsg

What use are standards?

Standards describe a current 'body of knowledge' that provides the basis for a professional discipline

- Basis for:
 - Communication – common terminology
 - Professional qualifications
 - Certification/compliance schemes
 - Benchmark of 'good industry practice'
 - Contracts
 - Interoperability and consistency.....

A Case in Point

Motivation for ISO 29119

-
- Demand for existing 'standards'
 - Conflicts in current definitions and processes
 - Gaps in the current standards provision
 - A Baseline for the Testing Discipline
 - Current industry practice is lacking
 - Buyers unclear on what is 'good test practice'

Standardization Bodies

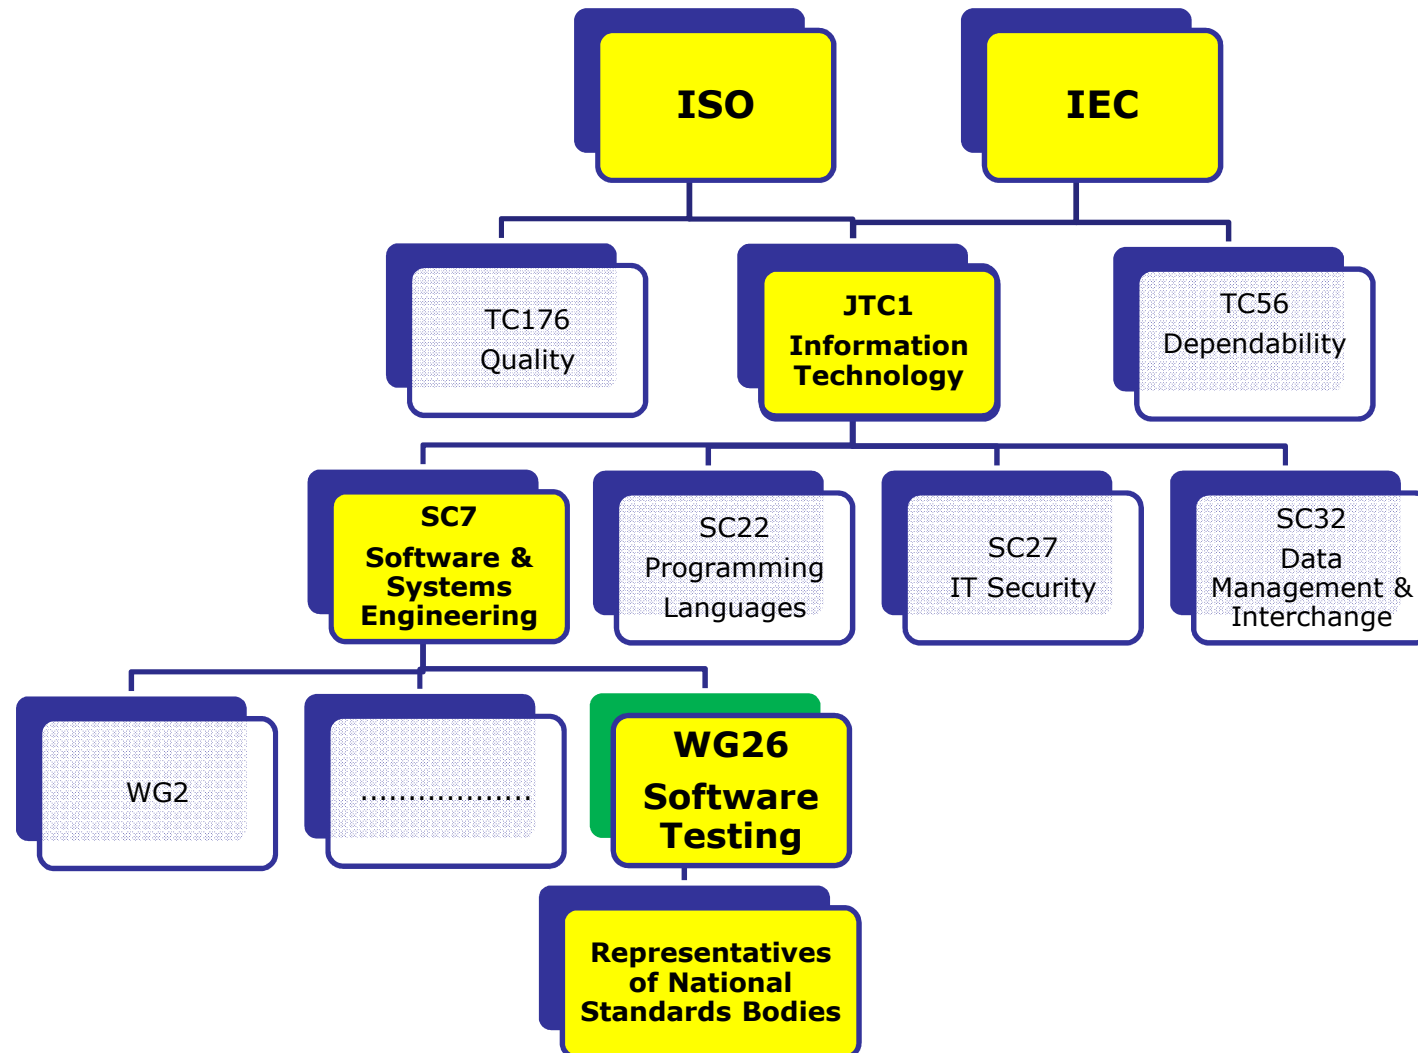

ISO/IEC Software Standards

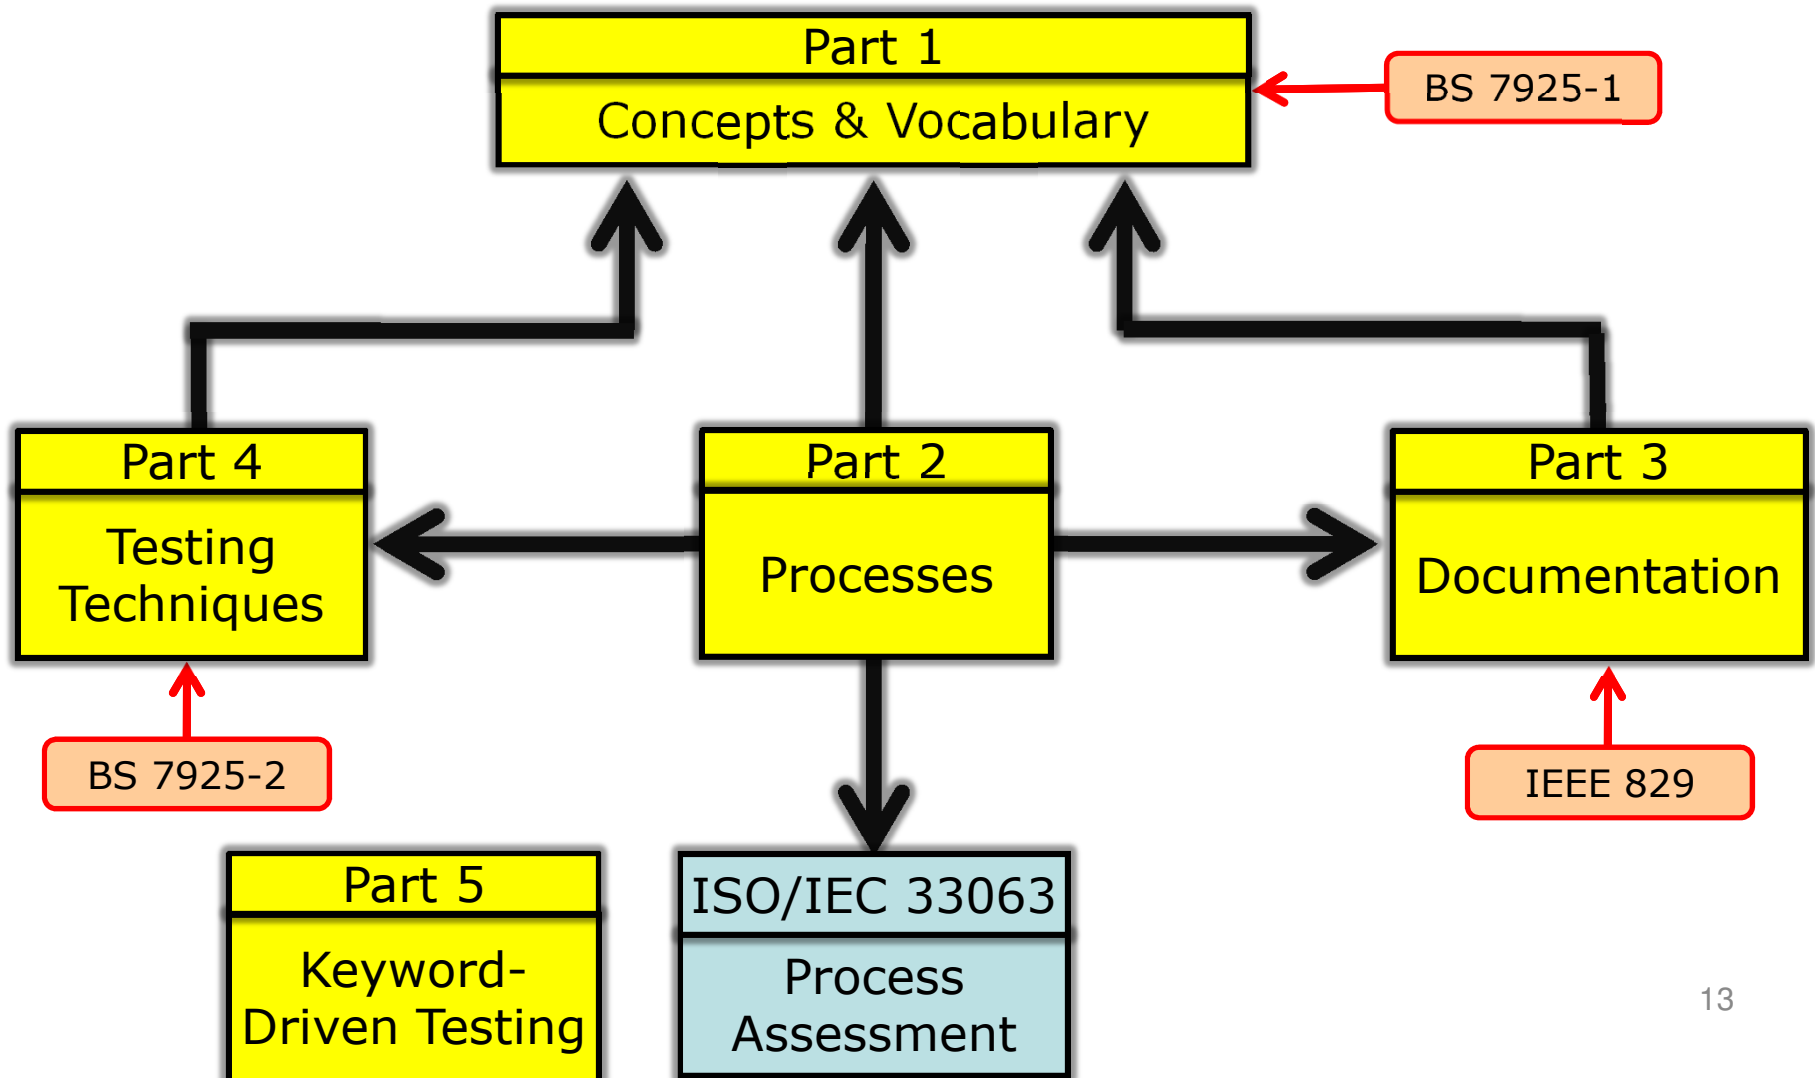

tsg

ISO/IEC SC7 – WG26

ISO/IEC 29119 – Structure

Part 1: Concepts & Vocabulary

Scope, Conformance, Normative References

DEFINITIONS

SOFTWARE TESTING CONCEPTS

TESTING IN DIFFERENT LIFE CYCLE MODELS

ROLES AND RESPONSIBILITIES IN TESTING

ANNEXES – Metrics, Examples, Bibliography

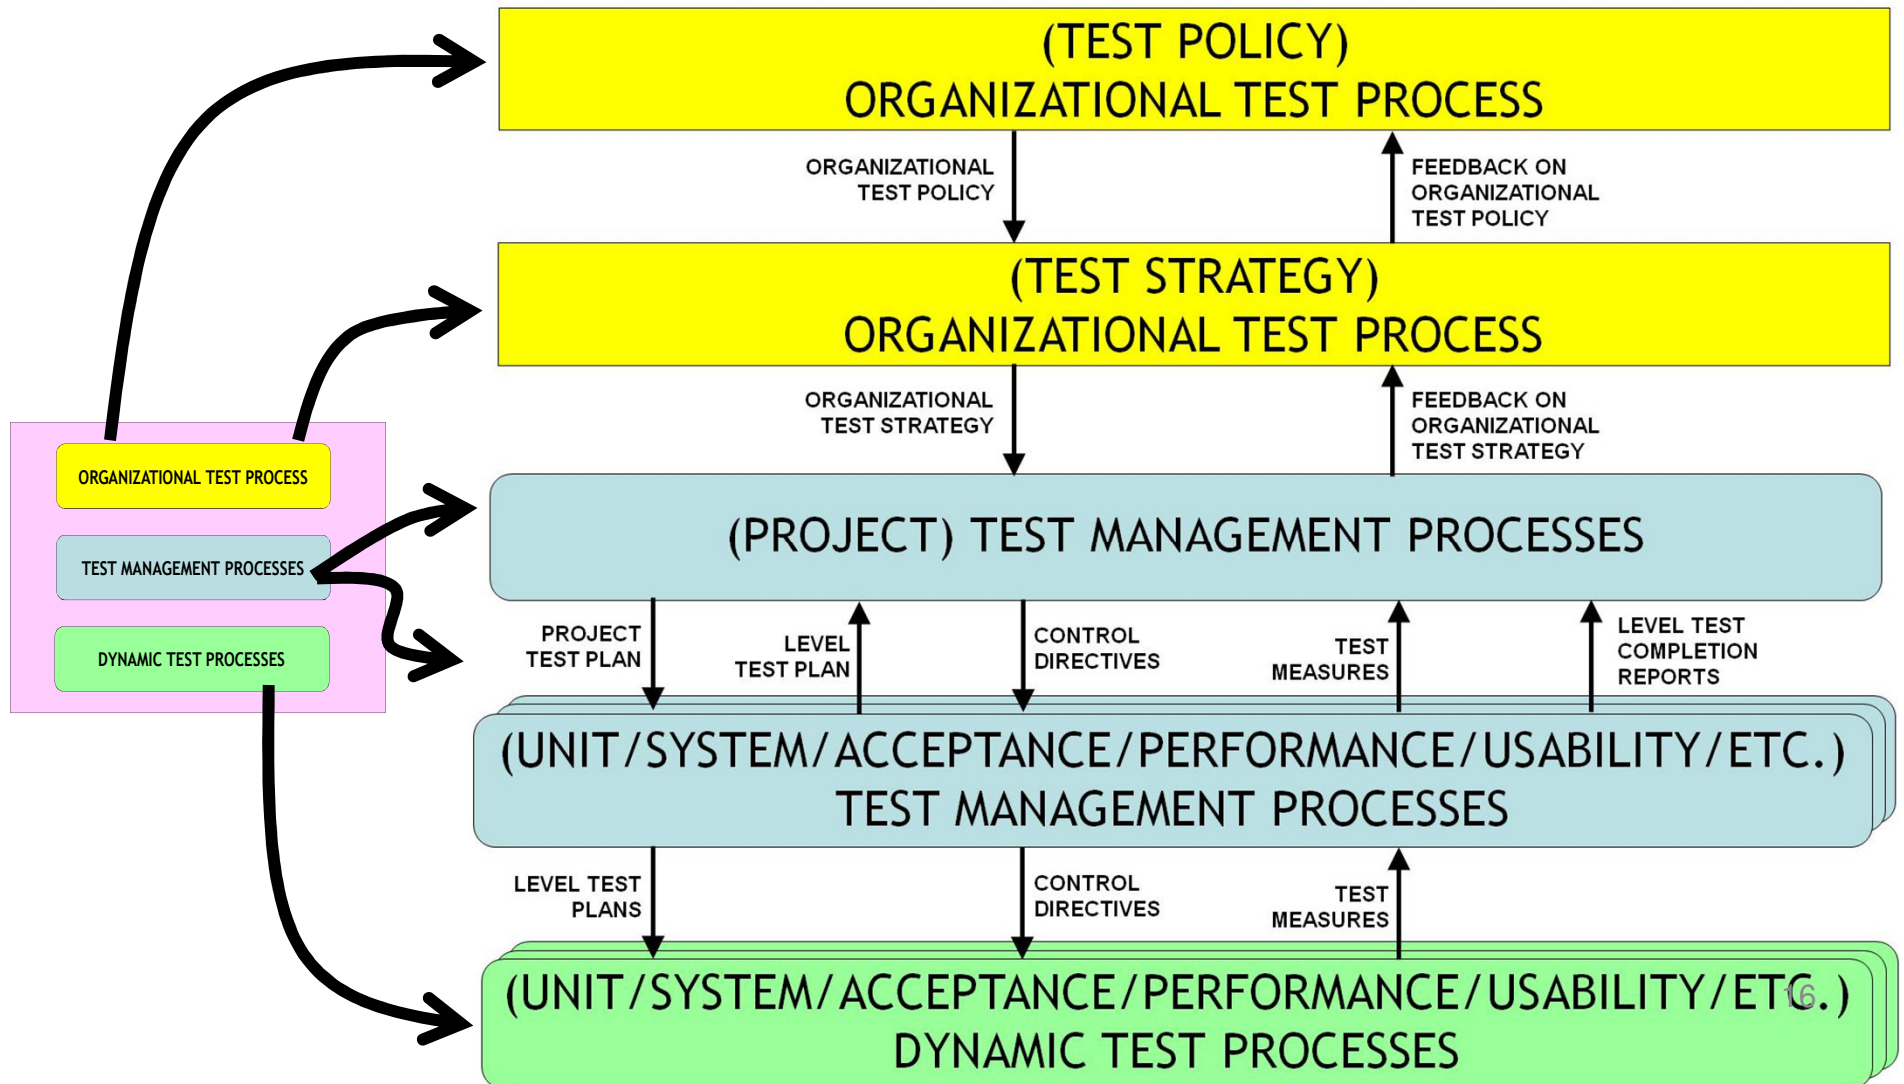

Part 2: Testing Processes

ORGANIZATIONAL TEST PROCESS

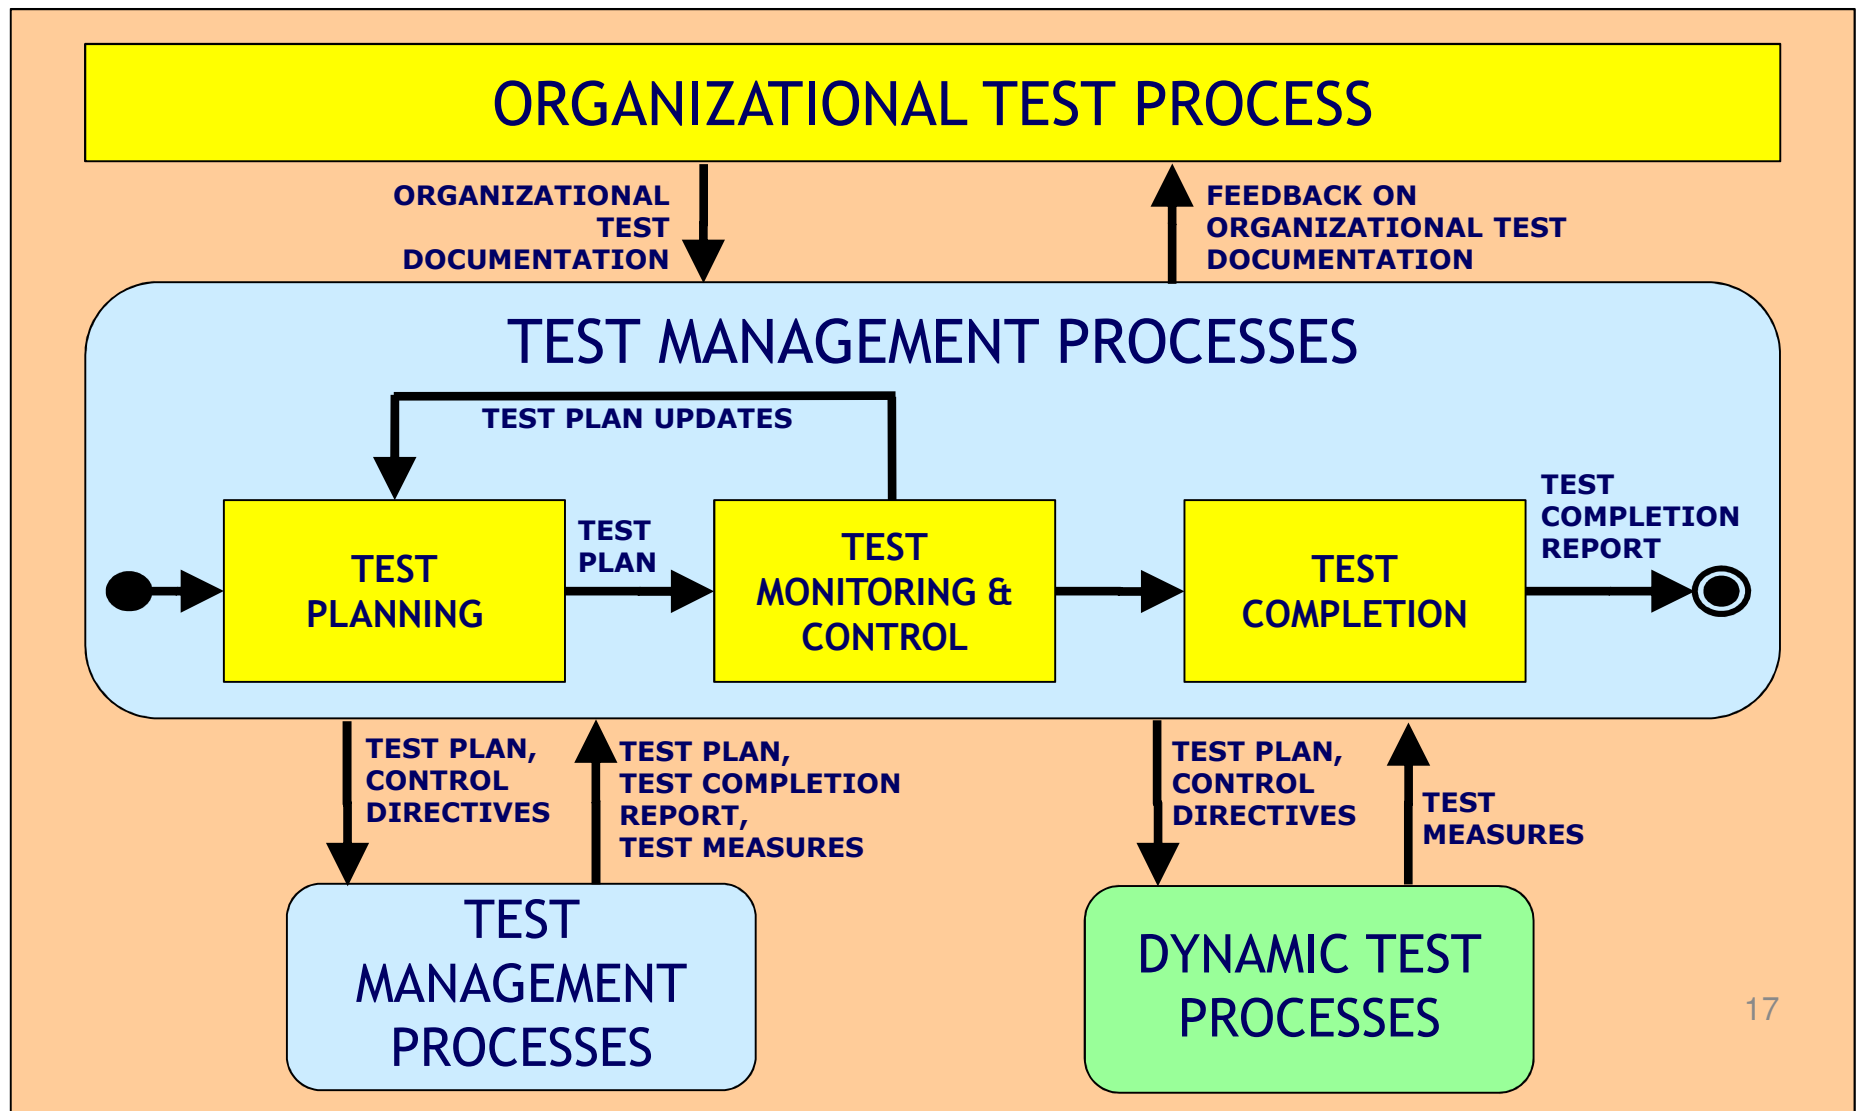

TEST MANAGEMENT PROCESSES

DYNAMIC TEST PROCESSES

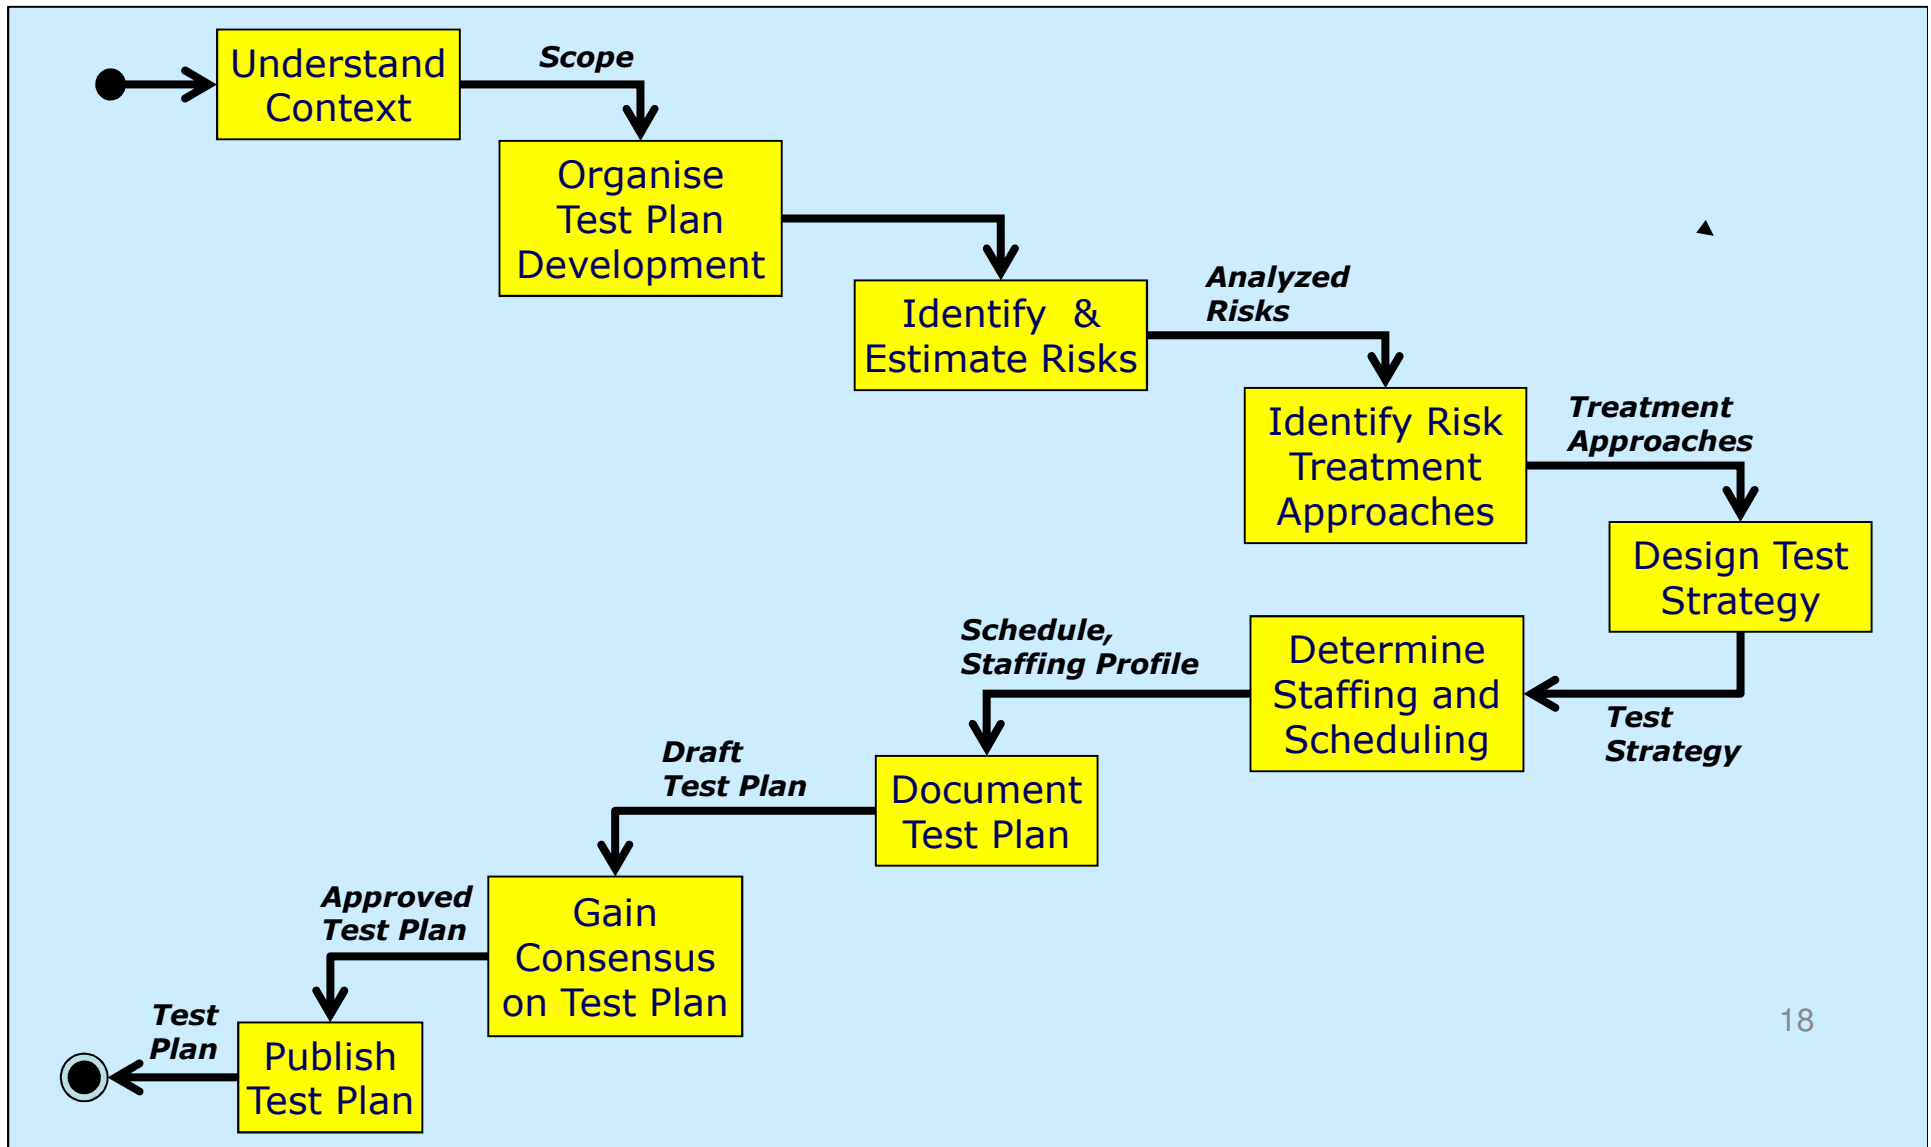

Instantiating Testing Processes

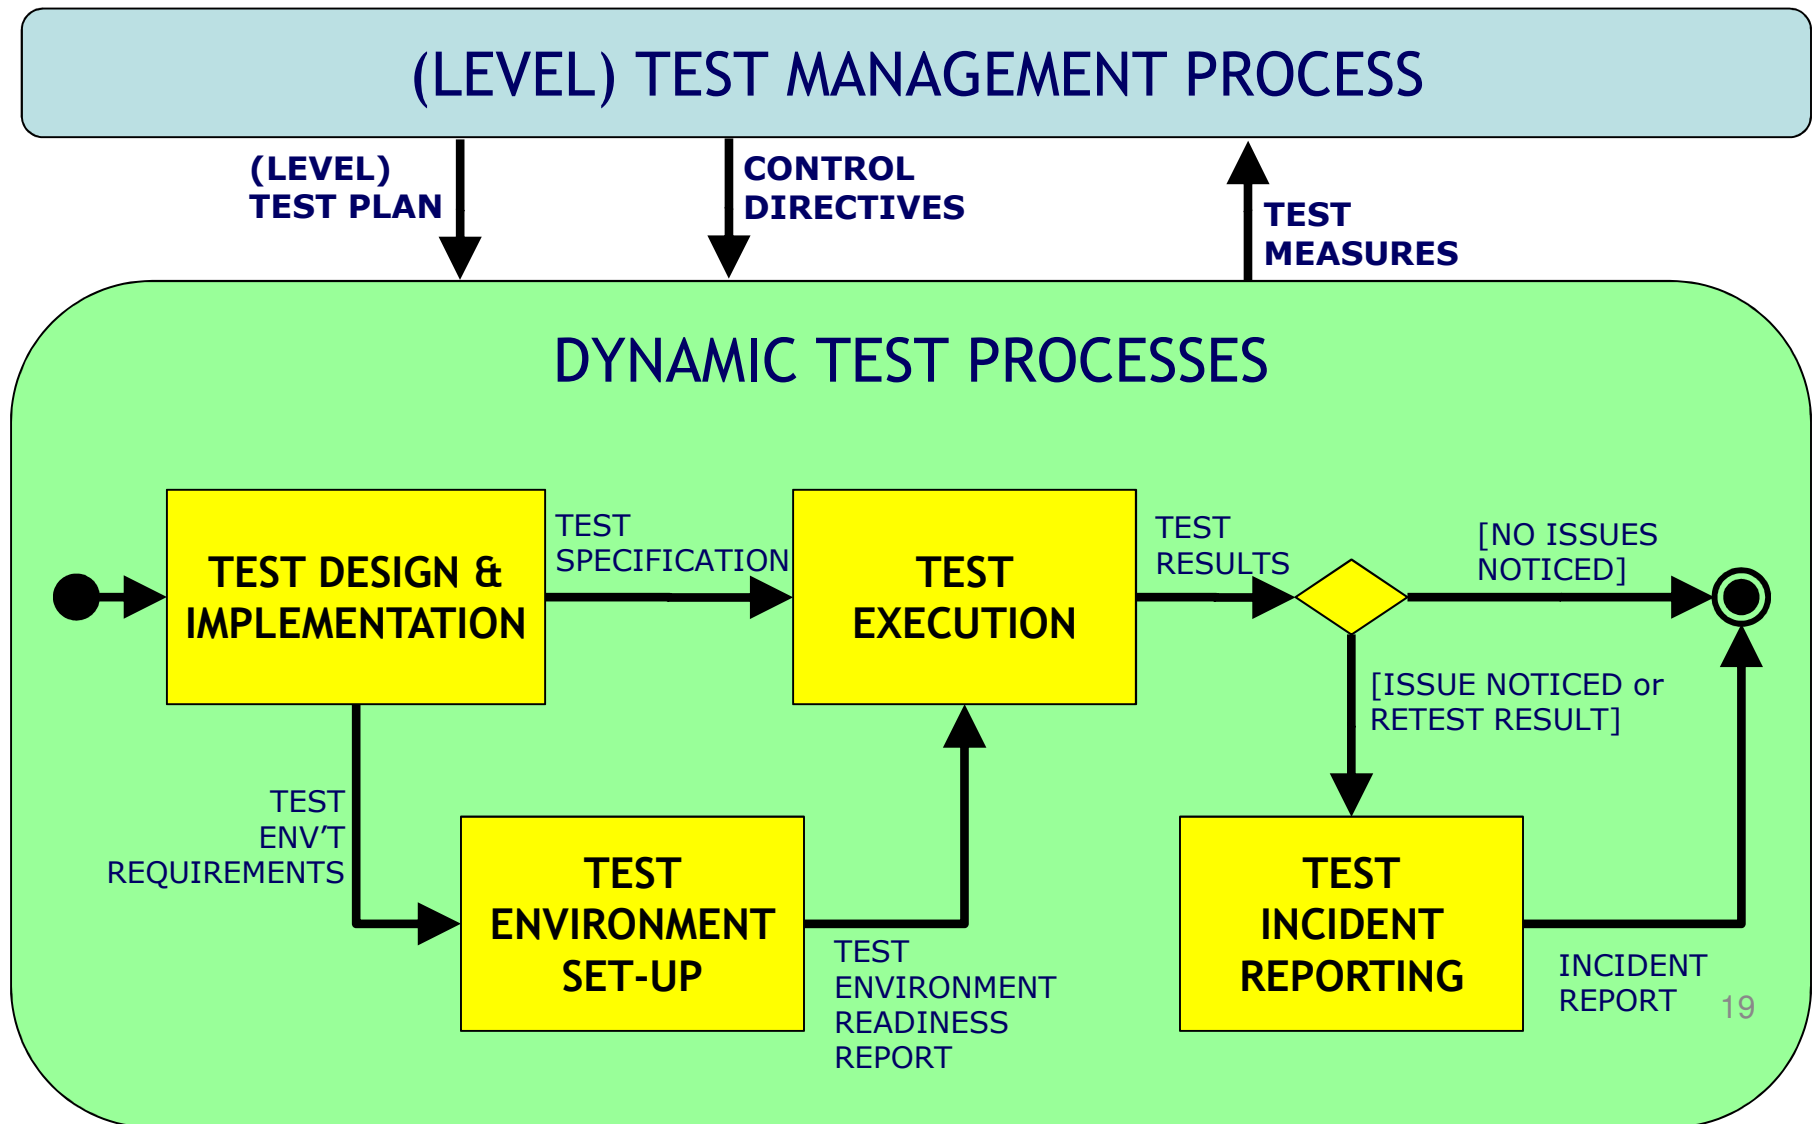

Test Management Processes

Test Planning Process

Dynamic Test Processes

Test Process Descriptions Example

- *Organizational Test Process*

- Each testing process is described using a standard template (following ISO 24774), for example:
- **Purpose**
 - The purpose of the *Organizational Test Process* is to develop and maintain organizational test specifications, such as the Test Policy and Organizational Test Strategy.
- **Outcomes**
 - As a result of the successful implementation of the *Organizational Test Process*:
 - The organizational test specification is developed based on stakeholder requirements;
 - The organizational test specification is agreed by stakeholders;
 - The organizational test specification is published and accessible to stakeholders;
 - Conformance of stakeholders with the organizational test specification is managed;
 - The organizational test specification is reviewed on a periodic basis;
 - Minor updates to the organizational test specification are made as necessary.
- **Activities and tasks**
 - The tester shall implement the following activities and tasks in accordance with applicable organization policies and procedures with respect to the *Organizational Test Process*.
 - **Develop Test Specification**
 - This activity consists of the following tasks:
 - Analyze any relevant source documents and the current testing practices within the organization to identify requirements for the organizational test specification.
 - etc.
 - **Gain Consensus on Test Specification**
 - **etc.**
- **Information items**
 - The output of the *Organizational Test Process* is the organizational test specification. The Organizational Test Policy and Organizational Test Strategy are typical examples of organizational test specifications.

Part 3 – Test Documentation

**Scope, Conformance,
Normative References**

TEST DOCUMENTATION

ANNEXES - EXAMPLES

Test Documentation Types

- Organizational test documentation
 - Test policy
 - Test strategy
- Project test documentation
 - Project test plan
 - Test project completion report
- Test level documentation
 - Test plan
 - Test specification
 - Test results
 - Anomaly reports
 - Level test status report
 - Test environment report
 - Test level completion report

Part 4 – Test Techniques

Scope, Conformance, Normative References

TEST DESIGN TECHNIQUES

BLACK BOX

WHITE BOX

TEST COVERAGE MEASUREMENT

ANNEXE – TESTING OF QUALITY CHARACTERISTICS

ANNEXE – SELECTION OF TECHNIQUES

ANNEXE – TEST TECHNIQUE EFFECTIVENESS

Are they applicable to you?

- Intended to be a generic standards
 - Full vs. tailored conformance
 - Small and large organizations
 - Agile and Traditional
 - Financial, Safety-Critical, Games...
 - Following Regulatory Standards?
-
- Can you afford not to?

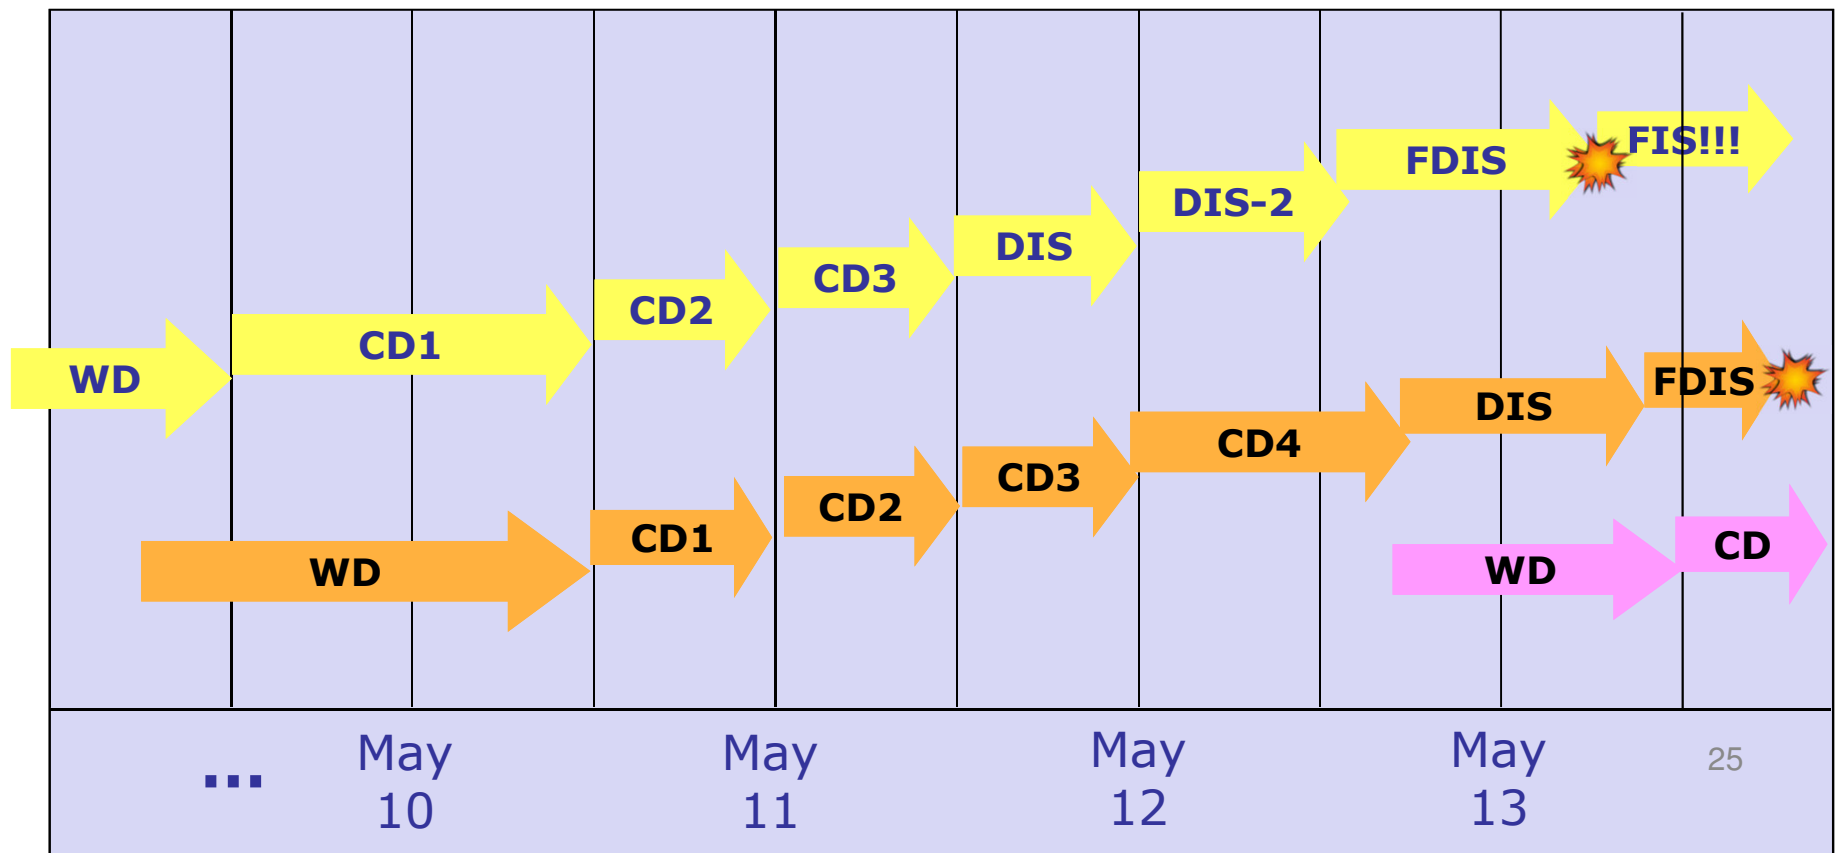

Current Status

Working Draft (WD)
Committee Draft (CD)
Draft International Standard (DIS)
Final Draft International Standard (FDIS)
Final International Standard (FIS)

Parts 1, 2 & 3

Part 5

Part 4

Current status

- Drafts are out for review
 - Unsurprisingly (for a testing standard) we get plenty of comments (1000s)
- Countries attending meetings include:
 - Argentina, Australia, Brazil, Canada, China, Colombia, Denmark, Finland, France, Germany, Hong Kong, India, Japan, Korea, Malaysia, New Zealand, Peru, Poland, Russian Federation, South Africa, Spain, Sweden, Turkey, UK, USA
- Last meeting – Montreal, May 2013
- Next meeting – Edinburgh, Nov 2013

What is most likely to stop ISO 29119?

- Fear of change
- 'Not invented here' syndrome
- Perceived as competition
- Lack of required use
- Anti-standardization – craftsmen
- No evidence of efficacy
- Cost of use
- Complexity
- Lack of responsiveness
- Lack of inclusiveness...

Conclusions

- Parts 1, 2 & 3 published September 2013
 - My thanks to the editors and reviewers 😊
- International standard will provide practitioners with guidelines for testing that cover all aspects of the life cycle
 - Provides a consistent set of definitions, processes, procedures & techniques for software testing
- Will be adopted by IEEE, BSI, ISO and other national standards bodies

Do you want to be involved?

- Join the working group
 - representing your national standards body
 - 6 day meetings, every 6 months
 - contribute between meetings
- Join a WG26 mirror group
 - for your national standards body
- Contribute materials
- Review drafts

Any Questions?
Any Volunteers?
